SUMMARY

Software Engineer who builds responsive, accessible applications that solve real problems. Works with modern frameworks to create user-centered products. Chooses the right technology for each project and works well with cross-functional teams to ship scalable, maintainable code.

SKILLS & TECHNOLOGIES

Programming Languages: Java, Python, C#, Kotlin, JavaScript, TypeScript, SQL, HTML, CSS

Front-end: React, Next.js, Vue.js, Tailwind CSS, Vite, Figma

Back-end: Node.js, Flask, REST API

Tools: Git, GitHub, BitBucket, AWS, Chrome DevTools, VS Code, Adobe Photoshop

Methods: Agile/Scrum, Responsive Design, WCAG Accessibility, SEO Optimization

EDUCATION

Software Engineering Technology - Artificial Intelligence

Centennial College

Jan 2022 - Jun 2025

GPA: 4.3/4.5

EXPERIENCE

AI Engineer (Intern)

Tandem Experiences

Sep 2024 - Dec 2024

Toronto, ON

- Wrote 100+ clean test cases and presented results to clients, connecting technical work with user experience goals.
- Worked with machine learning engineers to refine prompts, making responses more accurate and personal for end users.

Media Developer (Co-op)

Pearson Canada Inc.

Toronto, ON

K-12 Team

May 2024 - Aug 2024

- Fixed critical bugs during Vue2 to Vue3 migration, including route errors, UI alignment issues, and hover problems by refactoring components and handling asynchronous DOM updates.
- Debugged routing conflicts in Vue3 dropdown components to create a stable navigation experience.
- Researched Google Tag Manager integration for Vue3 and documented tracking solutions to restore analytics.
- Found and reported onboarding bugs using DevTools network analysis, which improved the first-time user experience.
- Set up development environments with Node.js, and used Bitbucket for version control.

K-12 Team

Sep 2023 - Dec 2023

- Migrated educational content and digital assets into Adobe Experience Manager (AEM) with accurate links, optimized navigation, and accessibility compliance.
- Improved user experience by fixing broken links, removing unused components, and restructuring navigation for English and French sites.
- Tested and debugged content across Chrome, Firefox, Edge, and IE to ensure consistent rendering.

Higher Education Team

Jan 2023 - Apr 2023

- Rebuilt static websites into modern, responsive interfaces with mobile-first design and WCAG and AODA compliant accessibility.
- Managed JSON-based content updates for eBooks, improving language accuracy across multiple regions.

SELECTED PROJECT

Personal Website: Web Portfolio | Next.js

2025 - Present

- Modularized code for better structure and easier maintenance.
- Improved web accessibility by applying proper color contrast and using aria-label properties for screen-reader users.
- Enhanced security by enabling HTTPS, adding security headers, and configuring CORS policies.
- Implemented multi-language support with React's Context API and used cookies for a seamless user experience.
- Built a fully responsive design with TailwindCSS.
